Erwan Leboucher

Berlin, Germany

Work experience

viafintech | Software Engineer

September 2019 – Present | Berlin Germany

viafintech is a payment service provider. Through viacash, they offer a solution for cash deposits, withdrawals and payment for clients like N26, bunq, Amazon.de in retails such as DM, Rewe, Penny.

- Integrated Alipay payment solution into their payment platform using Golang.
- Designed and developed an iOS and Android application to find the nearest retail partners with React Native.

(Golang, React / React Native, Postgresql, RabbitMQ)

GitGuardian | Full-Stack Developer

November 2018 – July 2019 | Paris, France

GitGuardian is a solution that scans GitHub activity in real-time for API secret tokens, database credentials, certificates and alerts the developer within a minute.

- Involved in the main website redesign, now viewed by more than 50k people per month.
- Built a B2B dashboard used by some Fortune 500 with Django and React.

(Django, Python, React, Postgresql, Golang)

Involvements & Hackathons

Android OS open-source community

February 2015 – November 2017

Adding improvements and features on the Android system and kernel, with Java and C. Member of multiple organizations such as LineageOS / Cyanogenmod and AICP. Recognized developer on the developer forum XDA.

Navya x 42 - Team Exedra - First Place

Mondial Paris Motor Show 2018 | CES 2019

Navya organized a contest with 42 about improving the user experience aboard the car. We envisioned a pop-up meeting room, then we engineered a platform to book and manage meetings with React Native and Express.
